PROFESSIONAL SUMMARY

Operations and analytics professional with experience leading cross-functional initiatives in semiconductor manufacturing environments. Background includes process improvement, operational planning, root -cause analysis, stakeholder coordination, and data-driven decision-making across engineering, facilities, and operations teams. Experienced supporting large-scale operational improvements, standard work development, and post-mortem corrective actions in fast-paced manufacturing settings.

EDUCATION

Post-Graduate Program in Data Science & AI/ML	2026
University of Texas	Austin, TX

Data Analytics and Visualization Certificate Program	2023
University of Texas	Austin, TX

Bachelor of Science in Business Administration, Economics	2019
University of Missouri	Columbia, MO

Associate of Science in Business Management and Accounting	2017
Barton County Community College	Great Bend, KS

WORK EXPERIENCE

Manufacturing Supervisor	Sep 2021 – Present
NXP Semiconductors	Austin, TX

- Led a cross-functional operational improvement initiative involving Engineering, Industrial Engineering, Equipment, and Operations teams that identified workflow inefficiencies and eliminated the equivalent of 1.0 FTE per shift, generating more than \$200K in annualized labor savings.
- Investigated a production event initially classified as human error by analyzing FDC data and leading structured root-cause analysis efforts, identifying a failed gate valve locking mechanism as the underlying issue and redirecting corrective actions based on objective findings.
- Directed post-mortem recovery efforts following a facility-wide power loss event, coordinating Engineering, Facilities, Operations, and Chemical/Gas teams to redesign loss-of-utility procedures and strengthen operational resiliency.
- Lead semiconductor manufacturing operations for a 20–40 person organization, leveraging data analysis, performance metrics, and cross-functional collaboration to improve equipment availability, throughput, and operational execution.

Inventory Lead Analyst

Lululemon

Sep 2019 – Aug 2021

Austin, TX

- Partnered with operations, supply chain, and regional leadership teams to support inventory planning and fulfillment strategy.
- Developed Excel-based reporting tools used by leadership to monitor delayed shipments, inventory movement, and fulfillment risks.
- Identified approximately \$560K in delayed shipments, helping leadership prioritize inventory reallocation and reduce fulfillment disruptions.
- Supported weekly sales forecasting and operational planning using inventory and sales trend analysis.

Management Trainee – Intern

Enterprise Rent-A-Car

May 2019 – Aug 2019

Wichita, KS

- Managed daily customer operations, logistics coordination, and contract execution in a high-volume branch environment.
- Contributed to branch growth through customer relationship management and referral business development.

PROJECTS

Predictive Analytics and Visualization Project

May 2023 – Dec 2023

- Developed predictive analytics models using Python and machine learning techniques to analyze historical performance data and identify key drivers of outcomes.
- Built interactive dashboards and web-based visualizations integrating SQL and Python workflows to improve accessibility of analytical insights.
- Communicated model findings through data visualizations and executive-level reporting, translating technical results into actionable recommendations.

SKILLS

Programming & Data: Python, SQL, PostgreSQL, Excel, VBA

Analytics: Statistical Analysis, Machine Learning, Data Visualization, Dashboard Development, KPI Reporting

Business & Operations: Root Cause Analysis, Process Improvement, Lean Manufacturing, Continuous Improvement, Operational Planning

Leadership: Cross-Functional Collaboration, Stakeholder Management, Project Leadership
